-

- Compound assignment operators
  - d) Separators
  - e) **Literals**
    - i. Integral Literals
    - ii. Floating Literals
    - iii. Character Literals
    - iv. Boolean Literals
    - v. String Literals
    - vi. Underscore in integral literals
  - f) **Comments**
    - ✓ Single level Comment
    - ✓ Multi level Comment
    - ✓ Document Comment
  - g) **Data types**
    - 1. **Primitive data types**
      - a) Byte, short, int, long, float, double, char, Boolean
    - 2. **Referenced Variables**
      - a) Arrays
      - b) Class
      - c) Interface
      - d) Enum
      - e) Annotation
      - f) Escape Characters
- 11. Casting**
- a) Implicit Casting
  - b) Explicit Casting
- 12. Arrays**
- a) Single Dimensional arrays
  - b) Double Dimensional arrays
  - c) Multi Dimensional arrays
  - d) Anonymous arrays
  - e) Jagged arrays
- 13. Statements**
- a) Sequential statements
  - b) **Control Statements**
    - I. **Conditional control statements**
    - II. **Loop control statements**
      - for
      - while
      - do..while

- Enhanced for loop/for-each loop
- III. Branching statements**
- Switch with String parameter**
- 14. Variables and type of variables**
- i. **Class level Variables**
    - 1) Static variables
    - 2) Non-static variables
  - ii. **Local Variables**
- 15. Blocks**
- a) Static blocks
  - b) Non-static blocks
- 16. Methods and type of methods,**
- a) Static methods
  - b) Non-static methods
  - c) Void methods
  - d) Non-void methods
  - e) Parameterized methods
  - f) Non-parameterized methods
  - g) Abstract Methods
  - h) Concrete Methods
  - i) Variable arguments in method parameters
  - j) Default methods in interface
  - k) Static methods in interface
- 17. Wrapper classes**
- a) Number
  - b) Byte
  - c) Short
  - d) Integer
  - e) Long
  - f) Float
  - g) Double
  - h) Character
  - i) Boolean
- 18. Conversions**
- a) Auto Boxing
  - b) Auto Un Boxing
- 19. Packages**
- a) How to create single package
  - b) How to sub packages

- c) How to package in other directory
- d) How to Access other packages
- e) Static import statement
- f) General import statement
- g) Difference between #include and import statements

#### **20. Accessibility Modifiers**

- a) Private
- b) Protected
- c) (package private) or default
- d) public

#### **21. Jar and its handling**

#### **22. How to create batch files**

#### **23. Data Hiding**

#### **24. Data Abstraction**

#### **25. Encapsulation**

#### **26. Command Line Arguments**

#### **27. Java.util.Scanner class and its method**

#### **28. Inheritance and Types of Inheritance**

- a) Single Level Inheritance
- b) MultiLevel Inheritance
- c) Hierarchal Inheritance
- d) Multiple Inheritance
- e) Hybrid Inheritance

#### **29. Interfaces**

- General interface
- Functional interface
- Marker/tagging interface

#### **30. Abstract Classes**

#### **31. Polymorphism**

- a) Static polymorphism
- b) Dynamic polymorphism
- c) Method overloading
- d) Method Overriding
- e) Covariant return types
- f) Method Hiding

#### **32. Inner Classes**

- a) Non-static inner class/simple inner class
- b) Static inner classes

- c) Method level inner classes
- d) Anonymous inner classes

#### **33. Java.lang.Object**

- a) getClass()
- b) toString()
- c) hashCode()
- d) equals
- e) clone()
  - a. Deep cloning
  - b. Shallow cloning

#### **34. JVM architecture**

#### **35. String Handling**

- a) Introduction to Strings
- b) Creating objects to String
- c) String Constant Pool
- d) String library functions
- e) Mutable objects
- f) Immutable objects
- g) String/StringBuffer/StringReader
- h) Creating Immutable class

#### **36. Exception Handling**

- a) Introduction to Error and Exception and Syntax Errors

##### **b) Types of Exceptions**

- i. Checked exceptions
  - Fully Checked Exceptions
  - Partially Checked Exceptions
- ii. Un checked exceptions

- c) Try, catch, throw, throws, finally
- d) Nested try blocks
- e) Multiple catch blocks
- f) Handling exceptions
- g) User defined exceptions
- h) Chained Exceptions
- i) Try with resource
- j) Catch block with multiple exceptions.

#### **37. IOStreams**

- a) What is Stream
- b) Types of Streams
  - a. Byte Streams
  - b. Character Streams

- c) FileOutputStream
- d) FileInputStream
- e) DataOutputStream
- f) DataInputStream
- g) FileWriter
- h) FileReader
- i) InputStreamReader
- j) Serialization
- k) De serialization
- l) Customization
- m) Externalization
- n) PrintStream
- o) System.out.println
- p) Console

### 38. Multithreading

- a) Introduction to multi tasking and multi threading
- b) Drawbacks in multi tasking
- c) Creation of Thread
- d) Life cycle of Thread
- e) Thread class
- f) Runnable interface
- g) Constructors of Thread class.
- h) Inline Thread Creation
- i) Priorities of threads.
- j) Naming to threads.
- k) Synchronization
- l) sleep(),join(), wait(), notify(), notifyAll(),
- m) ThreadGroup
- n) DeadLock
- o) ThreadPoll introduction
- p) ExecutorFrameWork
- q) ThreadLocal
- r) RseentrantLock

### 39. Net Working

- a) Introduction to networks
- b) Types of networks
- c) Client
- d) Server
- e) Client machine
- f) Server machine

- g) Request
- h) Response
- i) IP Address
- j) Port
- k) Socket
- l) Client –server architecture
- m) Socket programming example

### 40. Collection Framework and Generics

- a) Introduction to collections
- b) Introduction to generics
- c) Difference between arrays and Collections
- d) Collection interfaces

#### i. List Interface

- ArrayList
- LinkedList
- Vector
- Stack

#### ii. Set Interface

- Hashtable
- HashSet
- LinkedHashSet
- SortedSet
- NavigableSet
- TreeSet

#### iii. Map Interface

- Dictionary
- Hashtable
- Properties
- HashMap
- LinkedHashMap
- IdentityHashMap
- WeakHashMap
- SortedMap
- NavigableMap
- TreeMap

#### iv. Queue Interface

- 1) LinkedList
- 2) PriorityQueue
- 3) BlockingQueue

- `LinkedBlockingQueue`
- `PriorityBlockingQueue`

- e) `Collections Class`
- f) `Arrays Class`
- g) `Enumerations`
- h) `Iterator`
- i) `ListIterator`
- j) `Comparator`
- k) `Comparable`
- l) `Java.util.Stream api`
- m) `New date and time api`
- n) `Java.util.concurrent package`  
introductions and related  
implementation classes information
  - i. `CopyOnWriteArrayList`
  - ii. `CopyOnWriteArraySet`
  - iii. `ConcurrentHashMap`

#### **41. Date and Formatting text, Random, StringTokenizer**

#### **42. Internationalization.**

#### **43. API documentation and How to use it.**

#### **44. Annotations**

##### **a) Meta annotations**

- `Target`
- `Retention`
- `Inherited`
- `Documented`
- `Repeatable`
- `Native`

##### **b) Standard annotations**

- `Deprecated`
- `Override`
- `SuppressWarnings`
- `SafeVarargs`
- `FunctionalInterface`

#### **45. Reflections API**

`Java.lang.Class`  
`Java.lang.reflect.Method`  
`Java.lang.reflect.Field`  
`Java.lang.reflect.Modifier`

`Java.lang.reflect.Constructor`

#### **46. RegularExpression**

- a) `Pattern`
- b) `Matcher`

#### **47. Enums**

#### **Java 8 features:**

- a. `Lambda Expressions.`
- b. `Method References.`
- c. `Functional interface.`
- d. `Predefine functional interface`
- e. `Stream API.`
- f. `Default Methods in interface.`
- g. `Static methods in interface`
- h. `Collectors class.`
- i. `Optional Class.`
- j. `LocalDate,LocalTime,LocalDateTime,Period,Year`
- k. `Type inference`
- l. `StringJoiner class.`
- m. `Nashorn javascript engine`
- n. `Base64 encode and decode.`
- o. `Parallel array sort.`
- p. `Parameter reflection.`

#### **Java 9 features:**

- 1. `Jigsaw`
- 2. `JShell`
- 3. `Try with resource extra configuration`
- 4. `Factory methods in collection`
- 5. `Private methods in interface`
- 6. `Enhancements in stream api`
- 7. `Http2 client`
- 8. `G1 Garbage collector`
